High Piled Combustible Storage

2015 IFC Chapter 32 with 2018 updates

This seminar provides a basic understanding of the hazards associated with high-piled combustible storage and introduces the provisions in Chapter 32 of the 2015 International Fire Code and the changes that were made in the 2018 edition, placing special emphasis on the commodity classification, understanding the applicable NFPA 13 design criteria, various storage methods and how these contribute to fire behavior.
